Tortoise People

Tortoises share a relationship with mockingbirds
That benefits both and harms neither.
Mockingbirds well leap up and down facing the tortoise.
The tortoise will rise permitting the mockingbird
To reach otherwise inaccessible spots
The bird benefits from the food
The tortoises get rid of Parasites.
But some tortoises abuse this relationship.
After rising the bird goes beneath the tortoise to eat,
Whereupon the tortoise drops flat and kills the bird.
It then steps back and eats it.

Some people like tortoises abuse relationships
And after they rise and we trust them
Like the tortoise they drop flat on us
I have seen a lot of people drop flat
On people that trusted them
But the worst is when a minister or priest doses it
I have seen church of god preachers
In Cambridge Maryland drop flat on their members
And I know they have drop flat on babies

Jesus loves babies they are precious in His sight
Pray for the babies

Barry Wyatt Jr.
My thoughts express thought songs both sung and unsung are my prayers
Linking my songs together creates stories
